

General

I'm not clear on how to manually edit the First Four teams, since I can only see 4 of the 8 in the team entry screen. How do you do this?

Here is how to edit the First Four (play-in) teams and their opponents using Preferences -> Teams tab:

1. Select "First Four" from the Regions list.
2. Select one of the teams. Each team has an opponent from the "Opponent" popup menu.
3. Click on this and take note of which region and team is selected.
4. Now select that region from the Regions list and you can edit that First Four team
