

General

After I import the NIT teams, the teams are off by one round. How do I quickly advance them to the Round of 32?

Once you import the NIT teams, be sure to select **The Results** bracket and then select the download "Results" button so the teams advance to the Round of 32. In addition, when you create your Web Entry Form, be sure to select the "Fill Form to Results" option when using the NIT bracket or a Sweet 16 bracket.
