Brackets

Can I import brackets from a mailbox from Apple's Mail program?

Yes. First you should create a mailbox which contains only OfficePool Web Entry emails. Store all of your Web Entries
into this mailbox. Next, select Import Web Emails from the File menu. What you do next depends on the version of Mail
you are using:

Mail Version 2.x:

1. Select the "Select Directory" button. A dialog comes up asking you to select a directory (or folder).
2. Find the mailbox (*.mbox) file which is located in your xxx:LIBRARY:MAIL:MAILBOXES folder and then select the "Messages" folder.

Mail Version 1.x:

1. Select the "Select a File" button. A dialog comes up asking you to select a file.
2. Select the mailbox (*.mbox) file which is located in your xxx:LIBRARY:MAIL:MAILBOXES folder.
