## Web Entry Form

## When attempting to setup the database file index it is responding to me: "Invalid response from the database. Password could not be set."

This could be one of three things.

- 1. You are not using the latest version of OfficePool (See about box and make sure it's the current year and and matches the <u>latest version</u>).
- 2. You have not registered OfficePool for the current year
- 3. You do have a connection to the internet.
