General

How do I use the "Auto-Update" with SFTP or FTP?

You can use the "Save To Folder" option of the "Auto-Update" feature.

First you must mount the drive on your Mac or PC.

For MacOS:

1. From the desktop, click Finder
2. Select the Go menu
3. Choose the Connect to Server option
4. Enter in appropriate server address
5. Click Connect
6. Enter your Web Disk username and password if/when the system prompts you
7. Click Connect to open your Web Disk

If this doesn't work, try a search or see another method here:
