

Reports & Templates

I accidentally selected the Reports->Restore Default Templates Folder... menu item and then hit "Reset". How do I get back my old templates?

Select the Reports -> Show Templates Folder menu item. A Finder (or Explorer) window will open. Your old files will now be in a folder that begins with "Backup." (e.g., Backup.2012-03-11-162334).

Simply open this folder and copy the contents back into the Templates folder and your templates will be back to your modified versions.
