Reports & Templates

I think I have the reports title correctly shown through preferences. However, when I try to print the Standings, the top of the page reads "Report Title". If I save the file in html, the report title is shown correctly, but I don't like the formatting as well. I like to send my participants pdf files of the standings each day. Can you help?

Yes. See the Preferences, Printing tab and there you can set the title you wish to see when you print.
