General Usage

I used to indicate .1 for a 1/3 inning in the older software. I am getting some weird numbers if I use .3 or .7. How can I go back to using .1 and .2 for 1/3, and 2/3 innings?

As long as you have Statbook version 3.2 (or higher), this is now possible. Be sure to check out the <u>Videos Page</u> for a short tutorial on how to do this. The basic steps are as follows:

- 1. Go to the Games Input and change all your partial innings to .1 or .2
- 2. For every report and every statistic which uses Innings Pitched (i.e. IP, ERA, WHIP) you will need to select that field and use the corresponding "Favorites" formula
